Background Information and Status of the Program.....	2
State Law Reporting Requirements	2
Additional Program Data.....	8

Glossary

Cardholder: A qualifying patient, designated caregiver, or compassion center agent who has been issued and possesses a valid registry identification card.

Compassion Center: A manufacturing facility or dispensary.

Designated Caregiver: An individual who agrees to manage the well-being of a registered qualifying patient with respect to the qualifying patient's medical use of marijuana.

Dispensary: An entity registered by the department as a compassion center authorized to dispense usable marijuana to a registered qualifying patient and a registered designated caregiver.

Health Care Provider: A physician, a physician assistant, or an advanced practice registered nurse.

Manufacturing Facility: An entity registered by the department as a compassion center authorized to produce and process and to sell usable marijuana to a dispensary.

Qualifying Patient: An individual who has been diagnosed by a health care provider as having a debilitating medical condition.

Registry Identification Card: A document issued by the department which identifies an individual as a registered qualifying patient, registered designated caregiver, or registered compassion center agent.

Usable Marijuana: A medical marijuana product or the dried leaves or flowers of the plant of the genus cannabis in a combustible delivery form. However, the term does not include a cannabinoid edible product. In the case of a registered qualifying patient who is a minor, "usable marijuana" is limited to pediatric medical marijuana.

Written Certification: A form established by the department which is executed, dated, and signed by a health care provider within ninety calendar days of the day of application, stating that the patient has a debilitating medical condition. A health care provider may authorize an enhanced amount of dried leaves or flowers of the plant of the genus cannabis in a combustible delivery form to treat or alleviate the patient's debilitating medical condition of cancer. A written certification may not be made except in the course of a bona fide provider-patient relationship.

Background Information and Status of the Program

In November 2016, an initiated measure, known as the “North Dakota Compassionate Care Act,” was approved by voters. In January 2017, the provisions of the North Dakota Compassionate Care Act were suspended through legislation passed by the Legislative Assembly. On April 18, 2017, a new state law became effective requiring the North Dakota Department of Health (NDDoH) to establish and implement a Medical Marijuana Program allowing for the production and processing, the sale and dispensing of usable marijuana, and medical use of marijuana. Since the effective date of the new state law, the NDDoH has been committed to implementing a well-regulated program that protects the health and safety of qualifying patients and the public.

State law requires the NDDoH to register no more than two manufacturing facilities unless the NDDoH determines additional entities are necessary to increase access to usable marijuana by registered qualifying patients and registered designated caregivers. Two manufacturing facilities received their registration certificates in fiscal year 2019.

State law identifies the NDDoH is to register no more than eight dispensaries unless the NDDoH determines additional entities are necessary to increase access to usable marijuana by registered qualifying patients and registered designated caregivers. The NDDoH established eight regions within the state where dispensaries would be located. Regions are comprised of a 50-mile radius from selected cities. The first dispensary opened in Fargo in March 2019. Additional dispensaries opened during the 2019 calendar year with the eighth, and final, dispensary opening in December 2019 in Dickinson.

An online application process is used for registering qualifying patients and designated caregivers. During fiscal year 2022, the number of registered qualifying patients continued to grow. As of June 30, 2021, there were approximately 5,750 registered qualifying patients. As of June 30, 2022, there were over 7,950 registered qualifying patients.

State Law Reporting Requirements

House Bill 1213 passed by the 67th Legislative Assembly modified NDCC Section 19-24.1-39. NDCC Section 19-24.1-39 requires the NDDoH to submit an annual report that contains the following information:

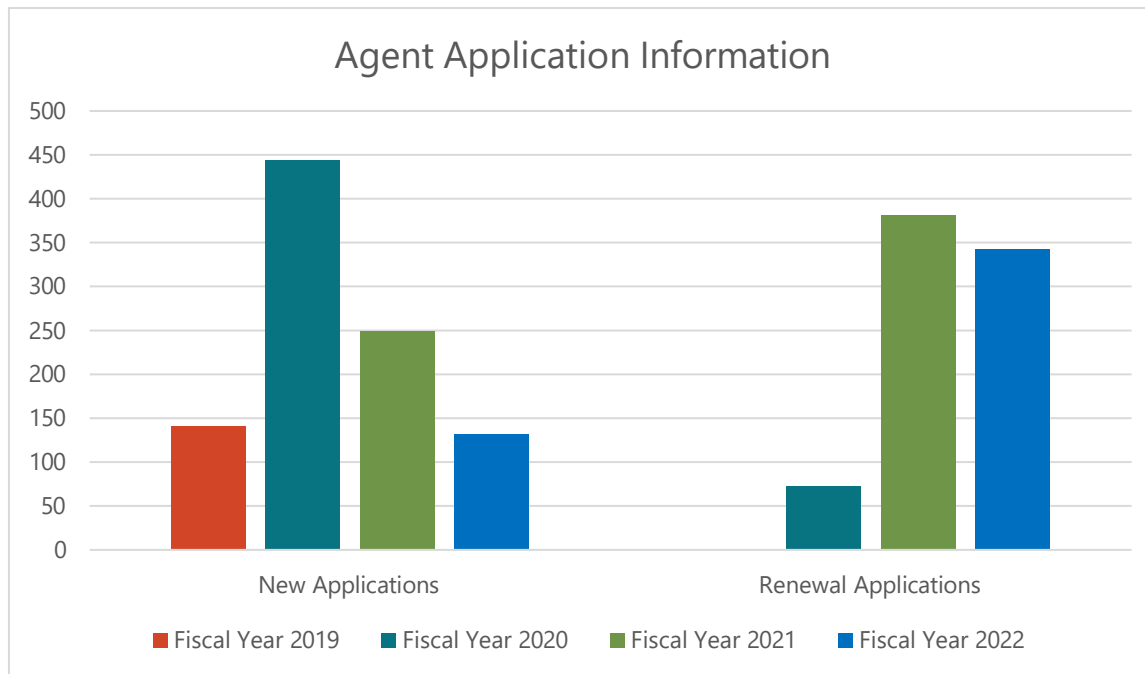

1. The number of registry identification card applications and renewals;
2. The number of registered qualifying patients, registered designated caregivers, and registered compassion center agents;
3. The nature of the debilitating medical conditions of the registered qualifying patients;
4. The number of registry identification cards revoked;
5. The number of health care providers providing written certifications for qualifying patients;
6. The number of compassion centers;
7. Any expenses incurred and revenues generated by the department from the medical marijuana program; and
8. Data for statistical purposes in a manner so that an individual person is not identifiable.

Data is reported as of June 30, 2022.

APPLICATIONS AND RENEWALS

Individuals applying to become a registered qualifying patient, designated caregiver, or agent submit their application through the North Dakota Medical Marijuana Program online registration system. The graphs below identify new applications and renewal applications submitted during fiscal years 2019 through 2022. As identified in the graphs below, there was an increase in applications received by the NDDoH (data from the Medical Marijuana Program online registration system).

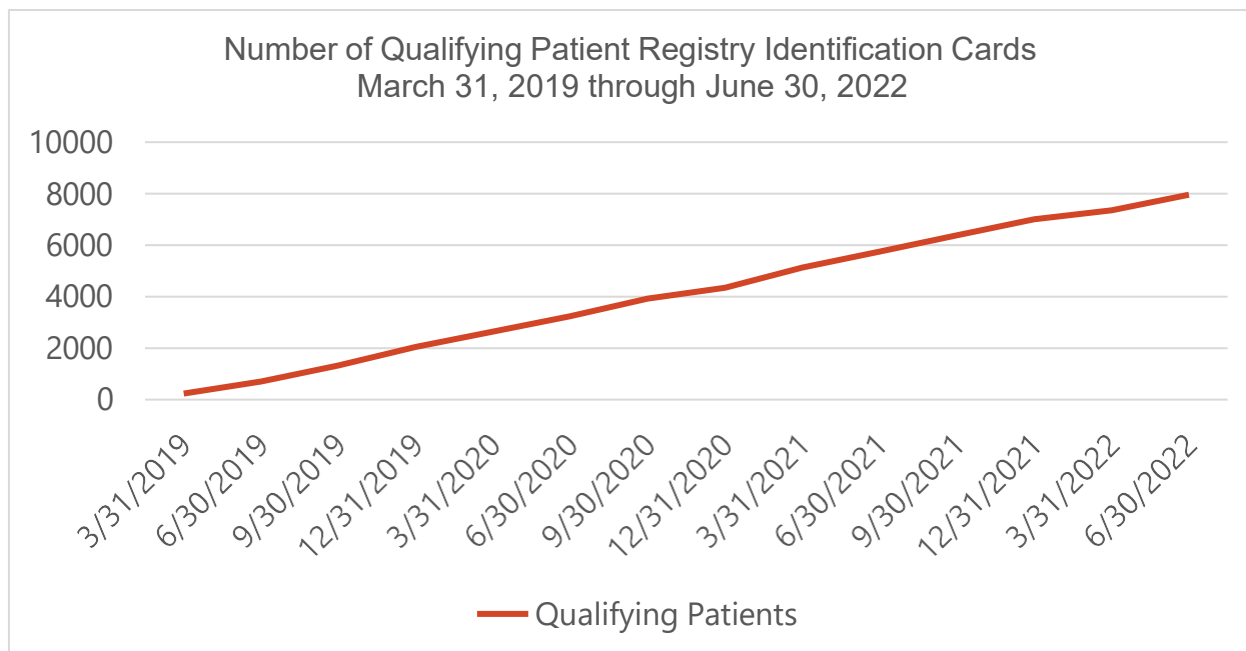

REGISTERED QUALIFYING PATIENTS AND DESIGNATED CAREGIVERS

An individual may possess more than one designated caregiver registry identification card (state law allows an individual to have up to five designated caregiver cards). Also, individuals may be considered an agent of multiple registered manufacturing facilities/dispensaries. Thus, card numbers are not reflective of the actual number of individuals with a registry identification card. The total number of registry identification cards as of June 30, 2019, 2020, 2021, and 2022 was (data from the Medical Marijuana Program online registration system):

Fiscal Year End Registry Identification Card Data				
	6/30/2019	6/30/2020	6/30/2021	6/30/2022
Qualifying patient cards *	707	3,233	5,754	7,958
Designated caregiver cards	34	109	139	167
Compassion center agent cards	91	410	408	416

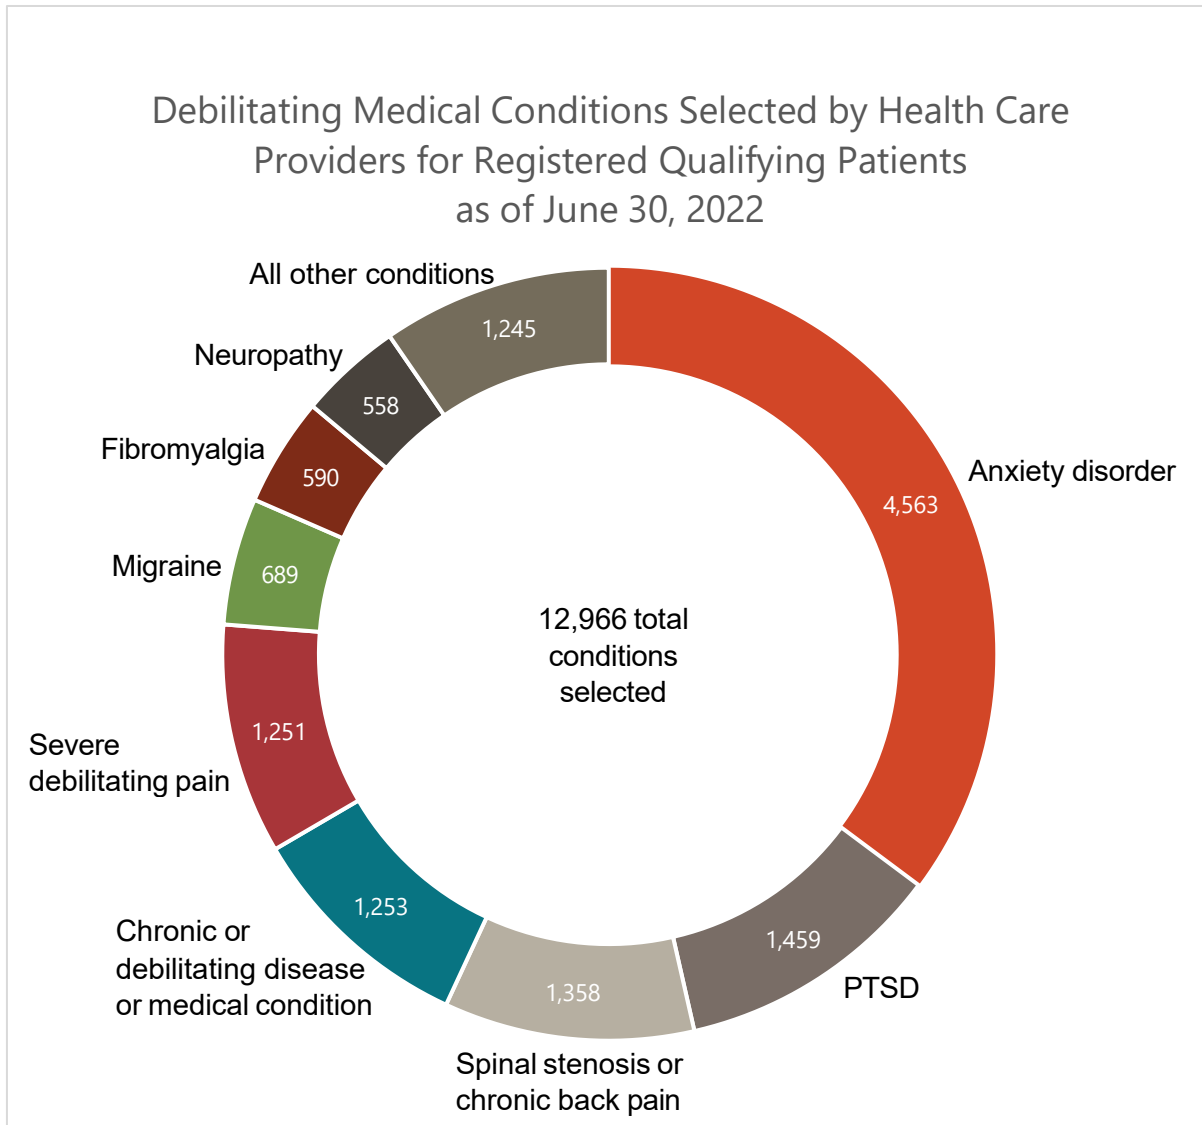

* Number of minor patients (those under the age of 19) was less than 40 in all four years.

The graph on the following page identifies information related to the number of qualifying patient registry identification cards active in the Medical Marijuana Program since the first month a dispensary was open in the state (March 1, 2019). As seen by the graph, the number of registered qualifying patients has increased significantly (data from the Medical Marijuana Program online registration system).

DEBILITATING MEDICAL CONDITIONS

A qualifying patient application requires a health care provider to complete a written certification. A health care provider must select at least one of the debilitating medical conditions authorized in state law. A health care provider may select more than one debilitating medical condition on a written certification (thus, the total number of conditions exceeds the registered qualifying patient data). The graph on the following page identifies the medical conditions selected by health care providers for the 7,958 registered qualifying patients as of June 30, 2022 (data from the Medical Marijuana Program online registration system). As the graph identifies, the top two conditions selected were anxiety disorder and post-traumatic stress disorder.

REGISTRY IDENTIFICATION CARDS REVOKED

In fiscal year 2021, there were 10 registry identification cards revoked (seven of which were qualifying patients). In fiscal year 2022, there were 16 registry identification cards revoked, broken out as follows (data from the Medical Marijuana Program online registration system):

- 12 qualifying patients
- 3 designated caregivers
- 1 agent

HEALTH CARE PROVIDERS PROVIDING WRITTEN CERTIFICATIONS

There were 340 health care providers who completed written certifications for registered qualifying patients as of June 30, 2022. This was an increase of 43 health care providers compared to June 30, 2021. A breakdown of the 340 health care providers is below (data is from the Medical Marijuana Program online registration system). Compared to the previous fiscal year, a slight increase in Advanced Practice Registered Nurses and Physician Assistants occurred.

- 55% Physicians
- 35% Advanced Practice Registered Nurses
- 10% Physician Assistants

House Bill 1283 of the 66th Legislative Assembly established a reasonable accommodation for veterans receiving treatment from a federal veterans' affairs (VA) entity. The accommodation was added to the qualifying patient application process. In lieu of a written certification, a veteran may be eligible to submit their medical records and a copy of their military discharge papers to the division. As of June 30, 2022, 276 registered qualifying patients were veterans who had used the reasonable accommodation.

COMPASSIONATE CARE CENTERS

The two registered manufacturing facilities and locations are:

- Grassroots Cannabis in Fargo (legal name GR Vending ND, LLC)
- Pure Dakota, LLC in Bismarck

The eight registered dispensaries and locations are:

- Curaleaf in Devils Lake
- Curaleaf in Dickinson
- Curaleaf in Jamestown
- Curaleaf in Minot
- Pure Dakota Health in Bismarck
- Pure Dakota Health in Fargo
- Pure Dakota Health in Williston
- We-Mend (Strive Life) in Grand Forks

DIVISION OF MEDICAL MARIJUANA EXPENSES AND REVENUE

Expenditures*			
	2017-2019 Biennium	2019-2021 Biennium	Fiscal Year 2022
Salaries and Wages	\$633,819	\$907,214	\$482,878
Operating	\$452,357	\$347,118	\$377,976
Total Expenses	\$1,086,176	\$1,254,332	\$820,854
General Funds			
	\$677,064	\$0	\$0
Special Funds			
	\$409,112	\$1,254,332	\$820,854

Revenue*			
	2017-2019 Biennium	2019-2021 Biennium	Fiscal Year 2022
Medical Marijuana Fees	\$1,023,300	\$1,874,374	\$920,050

* Expenditure and revenue data obtained from the state's accounting information system. OPERATING EXPENSES IN FISCAL YEAR 2022 HAVE BEEN UPDATED (initial report published did not include indirect costs of \$70,984).

Additional Program Data

House Bill 1213 of the 67th Legislative Assembly modified NDCC Section 19-24.1-37 regarding information the NDDoH may disclose. State law allows the NDDoH to disclose data for statistical purposes in a manner such that an individual or compassion center is not identified.

TOTAL DISPENSARY SALES

Data related to total sales at dispensaries is below. Only total sales information is provided to ensure an individual dispensary is not identified. In addition, sales information for fiscal year 2019 is not provided as only two dispensaries were open during the fiscal year (data from the Medical Marijuana Program state traceability and enforcement monitoring system; rounded to the nearest thousand).

Total Dispensary Sales (by Fiscal Year)			
	2020	2021	2022
Total Dispensary Sales	\$6,361,000	\$15,336,000	\$19,970,000
Percent of Total Sales that were Dried Leaves and Flowers	67%	72%	69%

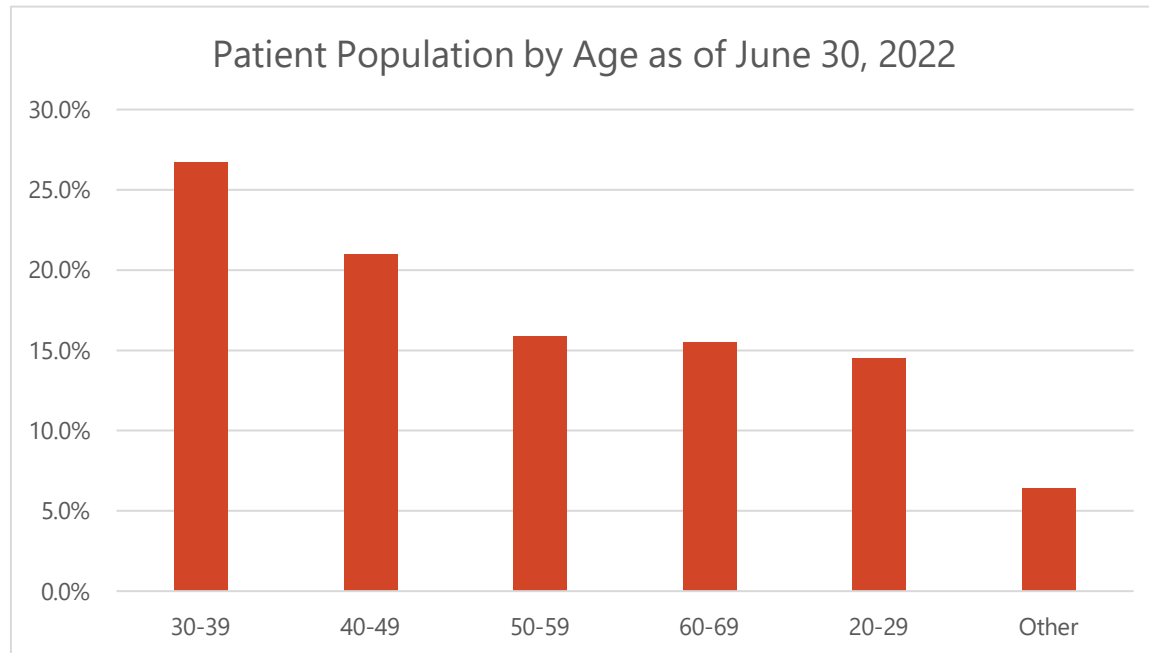

REGISTERED QUALIFYING PATIENTS BY COUNTY

The table on the following page identifies the county of residence for the 7,958 registered qualifying patients as of June 30, 2022 (data from the Medical Marijuana Program online registration system). The top three counties comprise approximately 48% of the registered qualifying patients. A county in the 'All other counties' category has less than 5% of the total registered qualifying patients.

Registered Qualifying Patients by County (as of June 30, 2022)	
	Percentage
Cass	23%
Ward	14%
Burleigh	11%
Grand Forks	9%
Williams	6%
All other counties	37%

REGISTERED QUALIFYING PATIENTS BY AGE

The graph below identifies age information for the 7,958 registered qualifying patients as of June 30, 2022 (from the Medical Marijuana Program online registration system). Nearly 50% of registered qualifying patients are between the ages of 30 and 49.
