[vacant] Center Child Care Provider – West		
<b>Total Members = 6</b>	<b>4</b>	<b>2</b>

### Staff Members Present

Carmen Traeholt, Early Childhood Licensing Administrator

Mariah Hill, Early Childhood CCDF Coordinator

Kay Larson, Early Childhood Director

- Meeting began at 3:03pm
- Member and staff introductions, welcome to new members
- Carmen Traeholt presented proposed early childhood law changes
  - Dependent on what is passed in the legislative session, there will be future ECS Advisory Board meetings to review NDAC
  - Purpose of proposed early childhood law changes is to reduce administrative burdens & support increased availability of child care
  - Decoupling Provider Training from license requirements
    - Benefits:
      - Assures that providers get “credit” for all training that is completed by staff
      - Removes de facto “black out period” that exists today in the 30-60 days before license renewal
    - Carmen responded to members’ questions
    - ECS Advisory Board members stated their support
      - Will help programs navigate training opportunities and timelines
  - Streamlining License Types
    - Reduce the number of child care licenses/non-licensed ECS types from 8 to 4
      - Child Care Center (Licensed)
      - Family Child Care (Licensed)
      - Self-Declaration (Registered)
      - In-Home Provider (Registered)
    - Benefits:

- Circumstances that require a change in license type will be greatly diminished, thus reducing the administrative burden of repeated licensure efforts.
- Consolidated license types will make it easier for providers to operate in and maintain compliance.
- Keeps all current program variations while removing overlapping provisions within licenses / program types
- Supports more consistent interpretation of rules
- Reduced complexity enables more timely system updates
- Easier for families to understand EC licensing expectations and philosophy
  - Providers would select a license type based on whether they serve 12 or more children (Child Care Center) OR 12 or fewer children (Family Child Care)
  - Admin Rule will provide direction specific to staff credentialing and other requirements based on type of setting and number of children served
  - A high-level comparison of current and future state by program type was provided
- Streamlining License Types - regarding programs that are exempt from having to apply for a license or registration
  - Current Public Approval providers
  - Allow certain programs operating as license exceptions to voluntarily request to be **recognized** by HHS as complying with the provisions of state law related to licensing.
- Member discussion
  - How can the state elevate the recognition of family child care providers as professionals; the same as center providers are viewed by the public?
  - Conversation on staff credential requirements - More and more staff do not have formalized training or come in with degrees; becoming more and more of a roadblock, especially director positions and school age
  - Underage staff cannot be left alone; very difficult and “left alone” needs to be better defined.
    - Carmen referred members to Early Childhood Services Policy for clarification
  - ECS Advisory Board members stated their support of the proposed law changes that were presented at today’s meeting.
- Meeting concluded 4:14pm
