

North Dakota Medicaid Quality Update

Medical Services Division, Medicaid Quality

This document is archived and is maintained for historical, research or record keeping purposes only.

Who we are

Meagan Heckaman

Medicaid Value Based Purchasing (VBP) Program Director

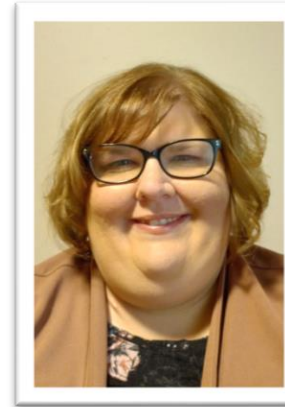

- Support the Department's initiative and agency priority of implementing a VBP model for our fee-for-service traditional Medicaid program
- Continuing to work towards our goals of improving the quality care for our members, Improving member access to care, improving member health outcomes, enhancing member experiences of care, and dampening the growth in cost in the program

Stacy Chadwick

Medicaid Quality Performance Manager

- Coordinate the state required child and adult quality reporting
- Coordinate comprehensive performance monitoring activities guided by the ND Medicaid Quality Strategy and across Medical Services to achieve goals
- Help drive quality performance and be instrumental to the support of the Departments' quality initiatives/activities
 - Strong asset to the culture of continuous quality improvement within Medical Services

Kayla Ebensteiner

Medicaid Quality Specialist

- Provide a range of analytical and administrative program support critical to the development and delivery of operations to both the Value Based Purchasing (VBP) Program and Quality Program delivery
- Integral part of putting VBP and Quality program delivery into practice as well as continuing to support the Departments' quality initiatives/activities

Quality Reporting

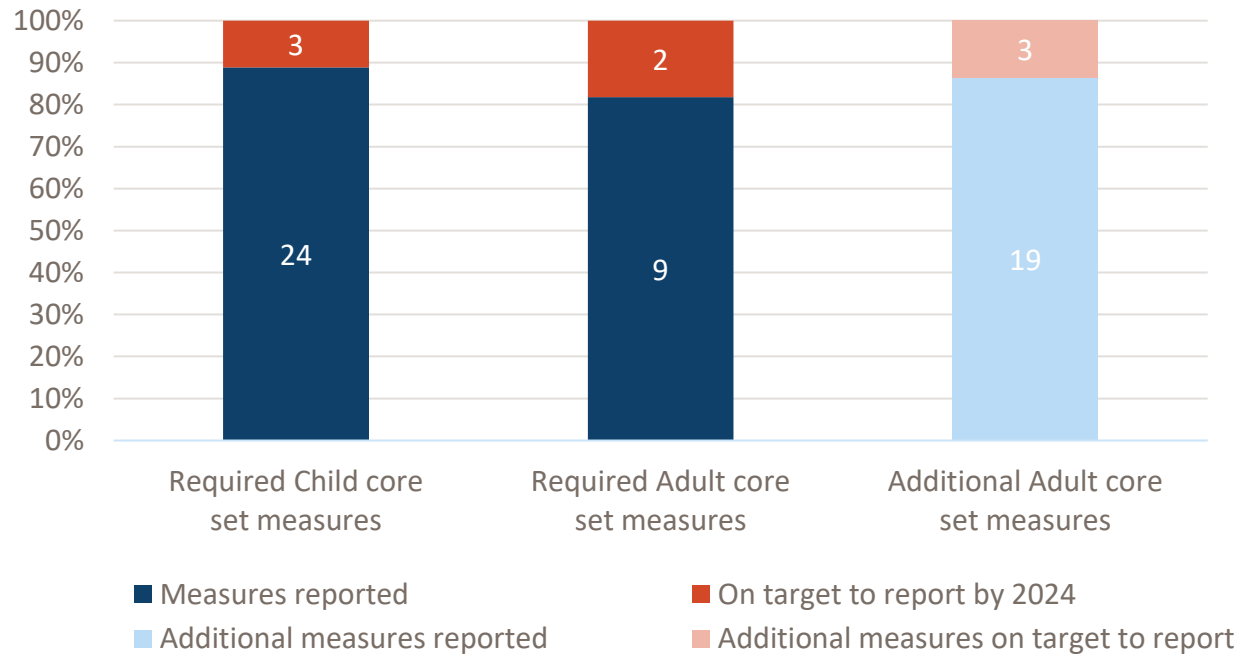

The purpose of the **Child and Adult Core Sets** is to estimate the overall national quality of care for Medicaid and CHIP beneficiaries based on a uniform set of health care quality measures. Although state reporting on the Core Sets is currently voluntary, the Child Core Set measures and the behavioral health measures in the Adult Core Set become mandatory for state reporting beginning in federal fiscal year (FFY) 2024.

- In order to support states' efforts to meet the upcoming 2024 mandatory reporting requirements and to provide sufficient time for states to prepare, the Centers for Medicare & Medicaid Services (CMS) released both the 2023 and 2024 Child and Adult Core Health Care Quality Measurement Sets based on the recommendations of the 2023 Child and Adult Core Set Annual Review.
- Timeline for reporting for 2023 (2022 results) will take place in September 2023.

Child and Adult Core Set Measures

Federal Fiscal Year 2023 – 2024 Measure Reporting

Quality Strategy

Managed Care (Expansion) Activities

- Assess Managed Care Organization's (MCO) strengths and weaknesses related to quality, timeliness, and access
- Recommendations for improving the quality of health care services furnished by the managed care plan and recommendations for how the STATE can target goals and objectives in STATE quality strategy
- MCO CAHPS® Survey results for adults
- MCO performance measure scores

Quality Overall

- Assess STATE's strengths and weaknesses, including quality, timeliness, and access to health care services furnished
- Recommend improvements to the quality of health care services furnished by STATE, including how STATE can target goals and objectives in the quality strategy to better support improvement in the quality, timeliness, and access to health care services
- CAHPS® Survey Results for adults, children, and Children with Chronic Conditions (CCC)
- Fee For Service (FFS) performance measure scores

Statewide Quality Strategy Plan

- Progress on achieving outlined goals
- Analyze gaps in plan
- Update the statewide quality strategy plan that covers the MCO Medicaid Expansion program and STATE's Medicaid program
