Summary of the HCBS Settings Rule

- ❑ Establishes requirements for the settings that are eligible for reimbursement for 1915(i) Medicaid Home and Community-Based Services.
- ❑ Requires states to ensure the 1915(i) HCBS benefit will be furnished to individuals in their homes and community, not in an institution.
- ❑ Ensures all individuals have personal choice and are integrated in and have full access to their communities including opportunities to engage in community life, work, attend school in integrated environments, and control their own personal resources.

This Power Point Overview

Will inform you of the:

- Resources used to verify settings compliance.
- Compliance Verification Process
- Categories of Settings & Compliance Measures Tiers

HCBS Settings Assessment Guide

This guide contains a short and long version of characteristics which are expected to be present in a HCBS setting.

This guide provides suggested questions to use in determining the presence or absence of each requirement in a setting while completing the Initial HCBS Setting Review form or Heightened Scrutiny Visit form during the site visit.

[HCBS Settings Assessment Guide](#) is located on the ND 1915(i) Provider Guidance and Policies webpage:

This toolkit provides detailed support using CQL tools and data elements to comply with CMS HCBS Settings Requirements.

Compliance Verification Process

Key Points

- Individuals residing in institutions are not eligible for 1915(i) services. The Person-Centered Planning Process & Self-Assessment must be completed for all 1915(i) individuals regardless of where they reside or where they receive services. The Care Coordinator verifies initial HCBS Settings Rule Compliance prior to the submission of the Care Coordination Plan of Care.
- No further Compliance Measures are required unless the individual will be receiving 1915(i) funded services within the setting they reside.
- At any point it is known the individual will be receiving 1915(i) services within the setting they reside, then the completion of a site visit and Initial 1915(i) HCBS Settings Review form and/or HCBS 1915(i) Heightened Scrutiny Visit Form and process.
- Correction is required at any point settings non-compliance is identified.

Ongoing Verification of HCBS Settings Rule Compliance

The Care Coordinator verifies ongoing HCBS Settings Compliance throughout the individual's participation in the 1915(i). This includes at least quarterly face-to-face meetings with the individual to:

- Assess and monitor the physical environment of the client's residence where 1915(i) settings are provided.
- Review if applicable settings modifications are still appropriate and necessary, and make necessary changes to POC
- Remediate non-compliance issues
- Complete a minimum of one annual Self-Assessment

Heightened Scrutiny Process

The care coordinator will:

- Utilize the 1915(i) Heightened Scrutiny form to evaluate all regulations and identify any institutional characteristics.
- Use provider policy review, observation and discussion with individuals, guardians, and provider staff as needed.
- Collaborate with the provider to identify any areas of noncompliance, remediation efforts, and timelines for completion.

See the 1915(i) HCBS Settings Requirements for additional information.

HCBS Settings Rule Remediation

If settings non-compliance is discovered, the care coordinator will initiate the appropriate settings verification process to determine if remediation is possible.

If remediation of the setting is a possibility, the care coordinator will initiate remediation using the person-centered plan of care process.

If the setting cannot be remedied, the care coordinator issues a 30-day advance written notice to the individual informing them they are not able to receive 1915(i) services in that setting and must relocate to a compliant setting within 30 days if they wish to continue to receive 1915(i) services in their place of residence. The care coordinator will provide assistance to the individual with finding other HCBS settings options that comply with the rule.

HCBS Settings Compliance Impact on Provider Reimbursement

Required HCBS settings compliance measures must be completed, and verification of compliance documented in the POC by the care coordinator.

Providers can't be reimbursed for 1915(i) services provided to an individual in a non-compliant HCBS Setting.

THIS CONCLUDES THE TRAINING
