

## **Documentation Requirements for Non-Surgical Periodontal Services**

## CDT © Code D4341 Periodontal scaling and root planing – four or more teeth per quadrant D4342 Periodontal scaling and root planing – one to three teeth per quadrant D4346 Scaling in presence of generalized moderate or severe gingival inflammation – full mouth, after oral evaluation D4355 Full mouth debridement to enable a comprehensive periodontal evaluation and diagnosis on a subsequent visit

## **Criteria for Coverage**

D4910

- D4341, D4342, and D4346 require service authorization for members 21 and older
- D4355 service authorization is not required, this cannot be billed on the same day as D0180.
   If billed in conjunction with any other dental exam, the exam must be medically necessary, and documentation must support the service.
- D4910 requires service authorization <u>after</u> limits have been met or exceeded. Service authorization will not be considered until limits have been met/exceeded.

Periodontal Charts are required for the above services when requesting Service Authorization.

Photos and/or Radiographs must be sent if periodontal charting is not available. The following requirements must be met:

- The medical record must reflect a probing depth of 5 mm or greater to be considered medically necessary
- Clinical Attachment Level (CAL) will be taken into consideration with radiographs to support dental necessity
- The depth chart must be no more than 1 year old

Periodontal maintenance

- The name of the patient and date of probing/chart must be legible on the periodontal charts
- Teeth planned for extraction within 90 days of the treatment for scaling and root planing must not be included in the SRP treatment plan. The appropriate code should be requested initially.
- The full SRP treatment plan may be requested in addition to the maintenance visits and the authorization will be approved for a two-year timeframe. (i.e., 4 quadrants of SRP and up to 6 periodontal maintenance visits.) This must be requested with the SRP treatment plan initially. The member must not meet the qualifications of the frequency or DD List as the authorizations cannot overlap. The full treatment plan and probing depths must be sent for consideration.
- If the patient has been approved for frequent recalls for periodontal maintenance, patient must have a history of having scaling and root planing performed with a probing depth of 5mm or

## **MEDICAL SERVICES**

- greater in at least one quadrant. Periodontal charting must be current within one year to support periodontal maintenance visits for patients receiving recall visits (i.e. "frequency list").
- Prophylaxis and Periodontal Maintenance (D1110, D1120, and D4910) is included in the above codes and cannot be billed separately
- Local anesthesia (D9210-D9215) is included in the above codes and cannot be billed separately
- If probing depths are unable to be obtained from the patient and no charting is available then documentation of the patient office visit <u>and</u> radiographs must be sent <u>prior to</u> the procedure taking place.
  - Documentation must meet ND Medicaid's dental documentation guidelines found in the ND Medicaid Dental Manual at: <a href="https://www.hhs.nd.gov/sites/www/files/documents/DHS%20Legacy/dental-manual.pdf">https://www.hhs.nd.gov/sites/www/files/documents/DHS%20Legacy/dental-manual.pdf</a>
  - If procedure is performed in the outpatient hospital due to patient disability, then
    periodontal charts will be needed on a <u>yearly</u> basis to determine medical necessity for
    the periodontal scaling.
  - If procedure is performed in the outpatient hospital due to patient disability and the patient has been previously approved for extra time, code D9920, probing depths will not be required.
