

2026 North Dakota National Child Passenger Safety Technician Certification Training

Course Information

This training provides basic technical skills, experience and knowledge about the proper use and installation of child car seats when working with parents and caregivers with child passenger safety needs.

Course Content

This training will provide participants with the technical skills to:

- Identify and correct misuse of car safety seats
- Serve as a community resource at a variety of community events such as car seat checkups
- Educate others about child passenger safety issues
- Reduce potential liability through standardization
- Receive knowledge and skills to meet national certification

Certification is achieved through a combination of lectures, hands-on practice, role-playing and written and hands-on skills testing. The training concludes with a community car seat checkup. Participants must be in attendance for the entire course and successfully pass to receive certification. The training provides POST and CNE credits.
