

"Safe Travel for All Children: Transporting Children with Special Health Care Needs"

Safe Travel for All Children: Transporting Children with Special Health Care Needs is designed to serve as an enrichment training for Child Passenger Safety Technicians who are interested in learning more about special needs transportation. The 2-day training combines classroom lectures and discussions with hands-on exercises. Participants will be introduced to medical conditions that can affect restraint selection and have the opportunity to investigate and install specialized restraint systems. The training includes a written exam and proficiency checkoffs that evaluate the student's ability to assess appropriate restraints and to demonstrate proper use and installation.

The next training in ND will be held in fiscal year 2026-2027
