

Vaccine Pre-Booking

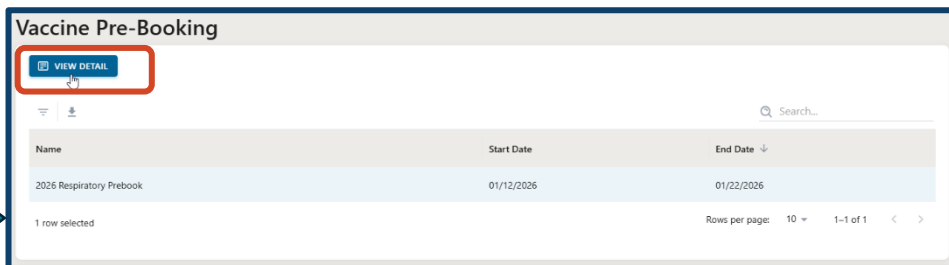

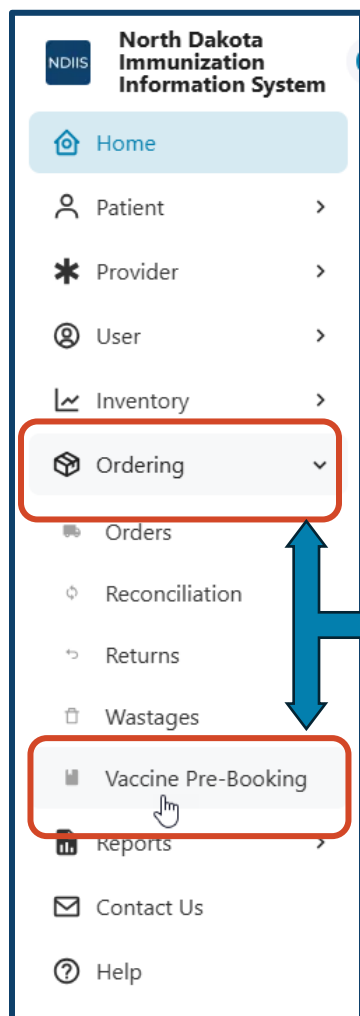

Getting Started

NDIIS Provider Sites are now able to complete their immunization prebooking through the NDIIS user interface. This functionality will be used for all immunizations that require prebooking, such as seasonal respiratory immunizations and all eligible providers will receive detailed communication from the Immunization Unit before and during the prebooking process.

Placing Your Prebook

1. NDIIS users with Provider Admin or Standard level user access will see the **Vaccine Pre-Booking** function under the **Ordering** option on their NDIIS Main Menu.

In the Vaccine Pre-Booking, users will see all current and previously submitted pre-books.

2. To review previously submitted prebooks or to enter a new prebook, click the prebook from the list displayed and select **View Detail**.
3. If today's date is on or after the selected prebook *End Date*, it will be view only.

5. Update the number of doses needed for pediatric and adult patients using the up/down arrows in the quantity boxes or typing the desired quantity.

- Quantities must be entered in multiples of the designated package quantity for each product.
- Only products available for adult patients through the Vaccines for Adults (VFA) program will allow users to enter an **Adult Quantity**.
- Total doses by product will be auto-calculated based on the **Pediatric Quantity** and **Adult Quantity** entered.

NDC	VACCINE	PRODUCT NAME	MANUFACTURER	CATEGORY	PACKAGING	PEDIATRIC QUANTITY	ADULT QUANTITY	TOTAL

6. Once all desired product quantities have been entered, click **Save**

7. Product quantities can be updated until the prebook end date.

8. If done updating or viewing the selected prebook, click **Back To Pre-Bookings** to return to the previous screen.

9. Users can also jump from the prebook to the NDIIS Patient Doses Administered by Age report. This report will provide doses administered by vaccine type by age group and can assist providers in determining how many doses they need to prebook based on how many public vaccine doses were administered during previous seasons.

a. Detailed instructions on the *Patient Doses Administered by Age* report can be found [here](#).
