North Dakota Part C Theory of Action

Strand

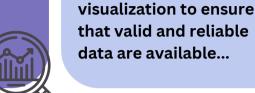

If ND EIS...

...has online data

Then...

Health & Human Services

Data Quality

...state, regional programs, families, and community stakeholders have data available for program planning and continuous improvement...

Professional Development

...designs a statewide system of performance support for stakeholders... ...early intervention leaders, families and EI professionals, develop at the program and community level, increasing recruitment and retention in the field...

Evidence-Based Practices

...families support their children's development through improved understanding of family routines and relationships...

...develops policies and procedures to ensure implementation of highquality early intervention practices... ...Service Coordinator and Infant Development providers effectively use statewide policies and procedures for high-quality service provision...

Outcomes

Evidence-based strategies support families' increased confidence and competence in supporting their children's social emotional development through natural learning opportunities.

There will be improved social emotional outcomes for children who come in below age expectation but make substantial gains.
