Place an "X" in the box that corresponds with the temperature (columns), day of the month and AM/PM (rows) for your temperature check. Enter your initials and the time you monitored the temperature in the appropriate boxes on the left. Write the minimum and maximum temperatures in number in the boxes on the right. Make sure to clear the Min/Max recordings daily. Temperatures out of range require immediate action. Write the exact temperature on the right. Please keep this temperature log for at least 3 years.
