

Employment and wages by occupation are compiled using results from a survey conducted by the Occupational Employment and Wage Statistics (OEWS) program. The sample-based survey asks employers to provide data regarding occupational employment and wages for their establishment. Employment and wage (annual and/or hourly) estimates are calculated and summarized for the state, four metro areas, two nonmetro areas, and eight planning regions. Employment and wages by occupation can be used to analyze occupational wage rates across markets, develop staffing patterns and occupation projections, and plan for careers. **This report references 2024 data.**

Occupation data are arranged by the 2018 six-digit Standard Occupational Classification (SOC) code. A code ending in four zeros (i.e. XX-0000) denotes a major occupational group, while all other codes indicate disclosable, detail occupations (it shouldn't be assumed that an occupation absent from the report is absent from North Dakota's job market).

DATA COVERAGE

As you use this report, keep in mind that the data are limited to those workers who are covered by either state or federal unemployment insurance laws. North Dakota law requires that all workers in the private sector be provided with this coverage by the employer if the employer employs one or more workers 20 weeks or more in a calendar year or pays \$1,500 or more in payroll in any calendar quarter. State law also requires that all state and local government workers be provided with this coverage. In addition, agricultural workers are covered if the employer employs 10 or more workers for 20 weeks or more in a calendar year or pays \$20,000 or more in quarterly payroll. Households with domestic help must provide coverage for their workers if the employer has a payroll that reaches or exceeds \$1,000 per quarter. The majority of the domestic help employed in North Dakota involves the care of the employer or other family members, either the aged or children, in the home.

There are a few select groups that are exempt from this coverage. They include:

- Self-employed (farm and nonfarm sectors);
- Individuals working for religious organizations;
- Students working for the college they attend; and
- Individuals employed in church-related elementary and secondary schools.

DATA DEFINITIONS

- Employment is the estimated total occupational employment.
- Average (mean) wage is the estimated total wages of an occupation divided by its employment.
- 10th percentile wage is an estimate based on the wage distribution of an occupation; 10 percent of workers in an occupation earn less than this wage and 90 percent earn more.
- 25th percentile wage is an estimate based on the wage distribution of an occupation; 25 percent of workers in an occupation earn less than this wage and 75 percent earn more.
- 50th percentile (median) wage is an estimate based on the wage distribution of an occupation; half of workers in an occupation earn less than this wage and half earn more. Unlike the mean, the median is less likely to be influenced by outliers within the wage distribution.
- 75th percentile wage is an estimate based on the wage distribution of an occupation; 75 percent of workers in an occupation earn less than this wage and 25 percent earn more.
- 90th percentile wage is an estimate based on the wage distribution of an occupation; 90 percent of workers in an occupation earn less than this wage and 10 percent earn more.

SURVEY METHODOLOGY

The OEWS survey is a semiannual mail survey measuring occupational employment and wage rates for wage and salary workers in nonfarm establishments in North Dakota. OEWS data include cross-industry occupational employment and wage estimates for the state, four metro areas, two nonmetro areas, and eight planning regions. The OEWS survey is a cooperative effort between the U.S. Bureau of Labor Statistics (BLS) and State Workforce Agencies (SWAs) including Job Service North Dakota. BLS funds the survey and provides the procedures and technical support, while the State Workforce Agencies collect most of the data. OEWS estimates are constructed from a sample of about 6,300 establishments. Each year, two semiannual panels of approximately 1,000 sampled establishments are contacted, one panel in May and the other in November. The 2024 estimates are based on responses from six semiannual panels collected over a 3-year period: May 2024, November 2023, May 2023, November 2022, May 2022, and November 2021. The average overall statewide response rate for the six panels was 69 percent.

The OEWS survey categorizes workers into 800+ detailed occupations based on the 2018 SOC system. Together, these detailed occupations make up 22 of the 23 SOC major occupational groups. Major group 55, Military Specific Occupations, is not included. On the industry side, the OEWS survey uses the 2022 North American Industry Classification System (NAICS). The OEWS survey excludes the majority of the agricultural sector, with the exception of logging (NAICS 113310), support activities for crop production (NAICS 1151), and support activities for animal production (NAICS 1152). Private households (NAICS 814) are also excluded. OEWS federal government data include the U.S. Postal Service and the federal executive branch only. All other industries, including state and local government, are covered by the survey.

The OEWS survey draws its sample from state unemployment insurance (UI) files. Supplemental sources are used for rail transportation (NAICS 4821) because they do not report to the UI program. The OEWS survey sample is stratified by metro and nonmetro area, industry, and size. To provide the most occupational coverage, larger employers are more likely to be selected than smaller employers. A census is taken of the executive branch of the federal government, the U.S. Postal Service, and state government.

Occupational employment is the estimate of total wage and salary employment in an occupation. The OEWS survey defines employment as the number of workers who can be classified as full- or part-time employees, including workers on paid vacations or other types of paid leave; workers on unpaid short-term absences; salaried officers, executives, and staff members of incorporated firms; employees temporarily assigned to other units; and employees for whom the reporting unit is their permanent duty station, regardless of whether that unit prepares their paycheck. The survey does not include the self-employed, owners and partners in unincorporated firms, household workers, or unpaid family workers.

Wages for the OEWS survey are straight-time, gross pay, exclusive of premium pay. Base rate; cost-of-living allowances; guaranteed pay; hazardous-duty pay; incentive pay, including commissions and production bonuses; and tips are included. Excluded are overtime pay, severance pay, shift differentials, nonproduction bonuses, employer cost for supplementary benefits, and tuition reimbursements. OEWS receives wage rate data for the federal government, the U.S. Postal Service, and most state government, local government, and private sector establishments. For the remaining establishments without wage rate data, the OEWS survey data are placed into 12 wage intervals. The intervals are defined both as hourly rates and the corresponding annual rates, where the annual rate for an occupation is calculated by multiplying the hourly wage rate by a typical work year of 2,080 hours. The responding establishments are instructed to report the hourly rate for part-time workers, and to report annual rates for occupations that are typically paid at an annual rate but do not work 2,080 hours per year, such as teachers, pilots, and flight attendants. Other workers, such as some entertainment workers, are paid hourly rates, but generally do not work 40 hours per week, year round. For these workers, only an hourly wage is reported.

The OEWS survey is designed to produce estimates by combining six panels of data collected over a 3-year period using a model-based estimation methodology (MB3). Significant reductions in sampling errors are

obtained by combining six panels of data, particularly for small geographic areas and occupations. Under MB3, data provided by survey respondents are used to model occupational staffing patterns and wages for all unobserved establishments in the population, including establishments that were not sampled, sampled establishments that did not respond, and respondents that did not meet stability criteria.

A donor pool typically consisting of 10 nearest neighbor responding establishments is used to predict data for each unobserved establishment; if 10 donors are not available, then as few as 5 can be used. Donors are matched to recipients based on detailed industry, geographic area, ownership, size, and survey panel. Within a given donor pool, donors that are more similar to the unobserved establishment are given more weight in determining the modeled data.

Each establishment's population employment is set as the average of its May 2024 and November 2023 employment from the Quarterly Census of Employment and Wages, the UI database from which the OEWS sample is drawn. Using adjustment factors derived from the OEWS survey data, wages collected in earlier survey panels are adjusted to the reference date of the estimates and donor wages are adjusted for differences between donor and recipient characteristics such as geographic area and industry.

Due to the timing of the data collection cycle, any recently enacted minimum wage changes may not be fully reflected in published wages.

OEWS data are point-in-time estimates. OEWS data should not be used as a time series. Challenges in using OEWS data as a time series include changes in the occupational (SOC), industrial (NAICS), and geographical classification systems. Changes are not applied to historical data. Additionally, OEWS data are comprised of six semiannual sample panels surveyed over a 3-year period, so year-to-year annual estimates include overlapping panel results together with newer panel results.

Planning region results are independently calculated using the Local Employment and Wage Information System (LEWIS), a stand-alone state application that utilizes the same methodology as BLS to calculate OEWS results. Unlike other published geographic areas, BLS has not validated planning region results, though state analysts have reviewed the data.

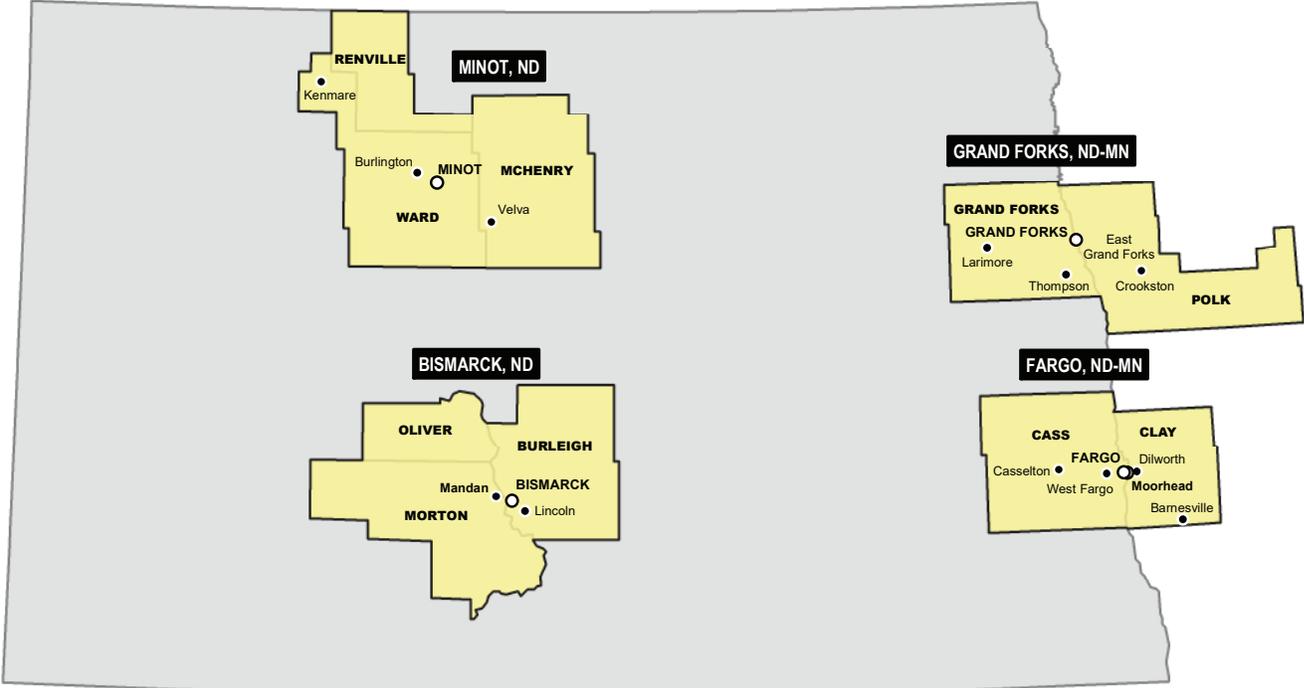

Data are subject to response and processing errors. Errors are reduced through careful review and screening procedures and contact with respondents whose data are inconsistent or appear to involve misinterpretation of instructions or definitions. Every effort is made to minimize human error. Data are provided as is and Job Service North Dakota makes no warranty, either expressed or implied, including, but not limited to, warranties of correctness and fitness for a particular purpose.

Beginning with the 2024 estimates, the OEWS program incorporated redefined metropolitan area delineations as designated by the U.S. Office of Management and Budget and based on the 2020 decennial census. For North Dakota, Minot became a metropolitan area consisting of McHenry, Renville, and Ward counties while the Bismarck metropolitan area was affected by a delineation change with the subtraction of Sioux County. Consequently, the composition of the West North Dakota nonmetro area was adjusted by subtracting McHenry, Renville, and Ward counties and adding Sioux County. All other metro and nonmetro area delineations remain unchanged.

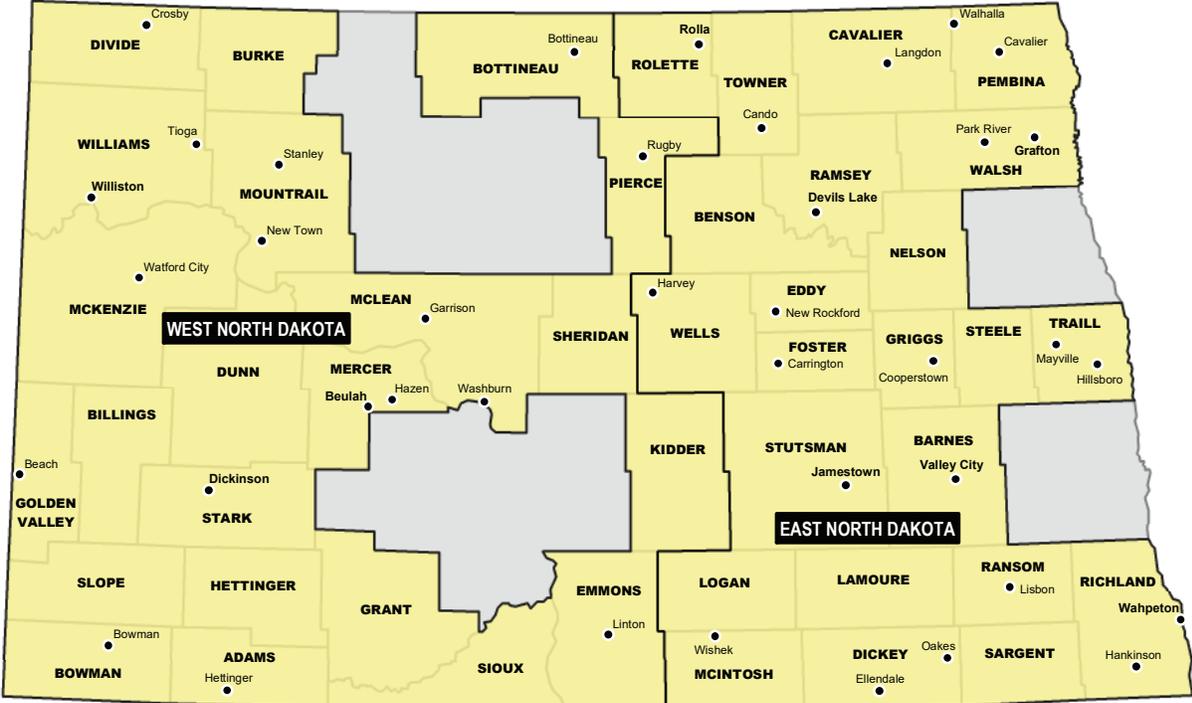

GEOGRAPHIC COVERAGE

OEWS data are produced for 15 geographic areas: North Dakota (state-level), four metropolitan statistical areas, two nonmetropolitan areas, and eight planning regions. **Beginning with the 2024 estimates, OEWS began publishing data for the Minot metropolitan area while the Bismarck metropolitan area was affected by a delineation change with the subtraction of Sioux County. Consequently, the composition of the West North Dakota nonmetro area was adjusted by subtracting McHenry, Renville, and Ward counties and adding Sioux County.**

METROPOLITAN STATISTICAL AREAS

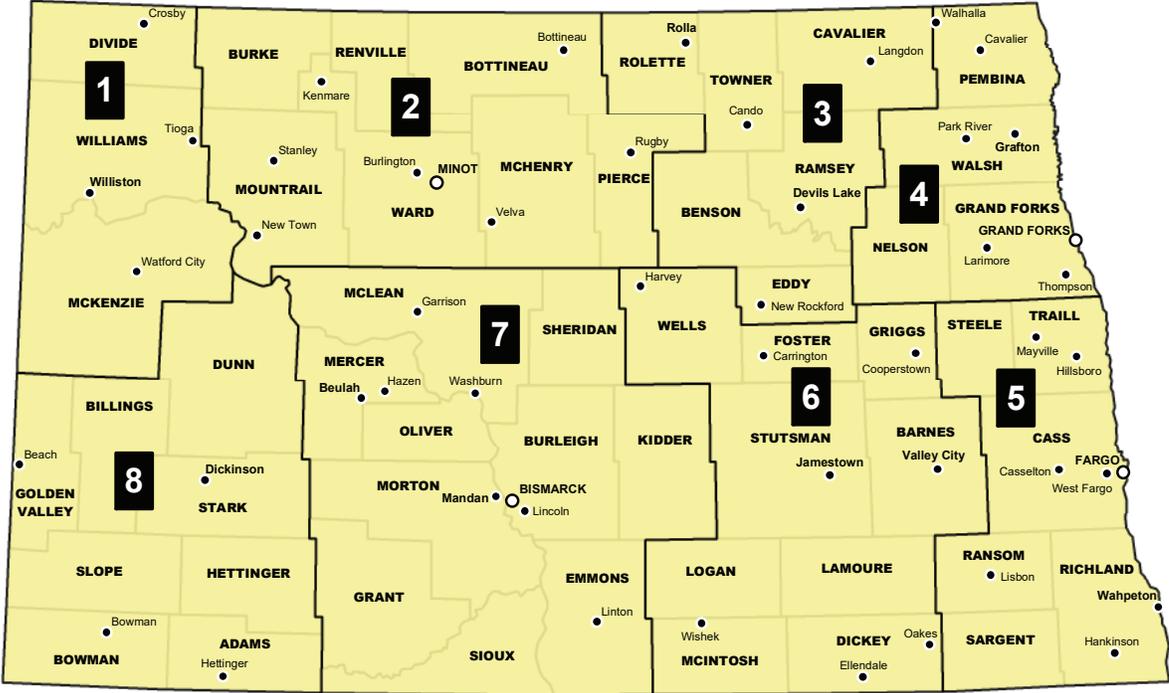

NONMETROPOLITAN AREAS

GEOGRAPHIC COVERAGE

OEWS data are produced for 15 geographic areas: North Dakota (state-level), four metropolitan statistical areas, two nonmetropolitan areas, and eight planning regions. **Beginning with the 2020 estimates, the Labor Market Information Center started publishing OEWS data for North Dakota’s eight planning regions.**

11-1021 General and Operations Managers							
Alternate Job Title(s): Department Store Manager; General Superintendent; Operational Risk Manager; Radio Station Manager							
Plan, direct, or coordinate the operations of public or private sector organizations, overseeing multiple departments or locations. Duties and responsibilities include formulating policies, managing daily operations, and planning the use of materials and human resources, but are too diverse and general in nature to be classified in any one functional area of management or administration, such as personnel, purchasing, or administrative services. Usually manage through subordinate supervisors. Excludes first-line supervisors.

51-2090 Miscellaneous Assemblers and Fabricators								
Alternate Job Title(s): Lead Team Assembler; Team Assembly Line Machine Operator; Team Automobile Assembler; Air Bag Builder; Crate Builder; Doll Maker								
Work as part of a team having responsibility for assembling an entire product or component of a product. Team assemblers can perform all tasks conducted by the team in the assembly process and rotate through all or most of them, rather than being assigned to a specific task on a permanent basis. May participate in making management decisions affecting the work. Includes team leaders who work as part of the team. Assemblers who continuously perform the same task are classified elsewhere in 51-2000. Includes all other assemblers and fabricators not listed separately.
