PREVENTION AND EARLY INTERVENTION PILOT GRANT

The goal of the ND Prevention and Early Intervention Pilot Grant is to develop a pilot which demonstrates improvement to children's behavioral health in a school setting. The goal of this project is to learn with schools on how a fully integrated continuum of support could look in various schools throughout North Dakota.

The appropriation for this effort can be reviewed in Section 24 of Senate Bill 2012.

Simle Middle School (Bismarck Public Schools) was awarded the original Pilot funding in October 2018.

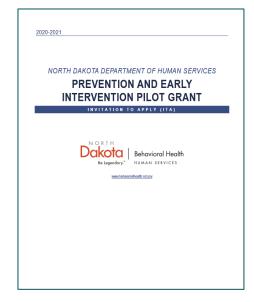

2019 Legislative Session established expansion of the pilot to included 2 additional schools serving rural and tribal schools.

PREVENTION AND EARLY INTERVENTION PILOT GRANT

Applications available August 3rd Due September 15th

Applications will be accepted from North Dakota **public or private elementary or secondary schools** which are able to demonstrate the following criteria:

- Serves a majority tribal and/or rural population
- Leadership support for innovative solutions regarding behavioral health.
- Successful implementation of the Multi-Tier Systems of Support (MTSS). Preferred candidates will articulate their Tier 1 interventions along with evidence of data collected.
- Readiness to implement strategies within 30 days of award.
- Ability to develop and implement a sustainability plan once the grant funds end.

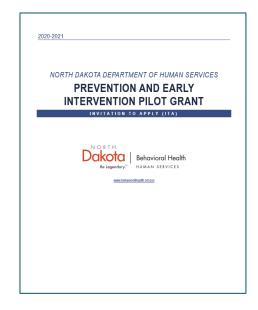

PREVENTION AND EARLY INTERVENTION PILOT GRANT

Grants up to \$75,000 will be awarded by October 1, 2020

Implementation period of the grants will be for the 2020-2021 school year.

Simle Middle School implementation resources and support will be available to awarded grantees. These resources include step by step implementation guide, assessment tools, templates, data collection, team to team coaching, onsite support, etc.

BEHAVIORAL HEALTH SCHOOL GRANT

(EFFECTIVE JULY 1, 2020)

Applications available end of August Open applications until funding is exhausted.

The sum of \$1,500,000 for the purpose of providing behavioral health services and support grants to school districts to address student behavioral health needs.

- To be eligible to receive a student behavioral health grant, a school district must submit a plan to the department of human services detailing collaboration with other regional school districts regarding student behavioral health needs and the use of grant funding to develop student behavioral heath interventions.
- A school district may not use grant funding to duplicate or fund existing services.

BEHAVIORAL HEALTH RESOURCE COORDINATOR SUPPORT

Post Request for Proposal mid-August Launch of support services October/November

To include:

- Behavioral health and prevention resources
- Emergency medical contacts and resources
- . Links to applicable grants and funding
- Multi-tiered Systems of Support (MTSS) resources
- Professional development resources
- Webinars/trainings

MEDICAID/EXPANSION

Reimbursable services currently include but are not limited to:

- Assessment and Diagnosis
- Testing
- Individual Therapy
- Group Therapy
- Rehabilitation Services
- Speech Therapy
- Occupational Therapy
- Targeted Case Management
- Transportation
- Medication
- Addiction Treatment Services

1915(I) MEDICAID STATE PLAN AMENDMENT

During the 2019 legislative session, North Dakota lawmakers authorized the Department of Human Services (Department) to create a Medicaid 1915(i) State Plan Amendment.

The amendment allows North Dakota Medicaid to pay for additional home and community-based services to support individuals with behavioral health conditions.

ELIGIBILITY

North Dakota's 1915(i) Medicaid State Plan Amendment draft proposes to serve individuals meeting the following eligibility criteria:

- 1. The individual is age **0+**; and
- 2. The individual is currently Medicaid or Medicaid Expansion Eligible; and
- The individual resides and will receive services in a setting meeting the federal home and community-based setting requirements, and
- 4. The individual has a diagnosis of mental illness, substance use disorder, or traumatic brain injury, excluding intellectual disability or developmental disability, identified in the most recent diagnostic and statistical manual.

In addition, the participant must also meet the following needs-based eligibility criteria: Have a **functional impairment**, which substantially interferes with or substantially limits the ability to function in the family, school or community setting, as evidenced by a complex score of 50 or higher on the WHODAS 2.0.

1915(I) MEDICAID STATE PLAN AMENDMENT PROCESS

- Individual is approved for Medicaid or Expansion
- Individual is approved for 1915i
 - Diagnosis, Community Setting, Functional Impairment
- Care Coordination Agency is responsible to develop a Person-Centered Care Plan
- Individual receives services identified in their individualized care plan
- Quarterly meetings with the care coordinator to assess implementation of the plan and ongoing needs
- Annual eligibility renewal

SERVICE TYPE	DESCRIPTION	AGE
Care Coordination	Coordinates participant care, develops Person-centered Plan of Care plan of care and assists individuals with gaining access to needed1915(i) and other services.	0+
Training and Supports for Caregivers	Service directed to individuals providing unpaid support to a recipient of 1915(i) services. Services are provided for the purpose of preserving, educating, and supporting the family and/ or support system of the individual.	0+
Community Transitional Services	Non-recurring basic household set-up expenses for individuals transitioning from certain institutions to a private residence where the person is directly responsible for his or her own living expenses. Transition Coordination services are also available	0+
Benefits Planning	Assists individuals considering employment with making informed decisions regarding public benefits and work incentives. Counselors are knowledgeable on public benefits, including Social Security Disability Insurance (SSDI), Supplemental Security Income (SSI), Medicare, Medicaid etc.	0+

PARENTS LEAD

Anxiety is a basic human instinct that exists to alert us to potential danger. Unfortunately the number one mental health issue for children in the United States is having such an excess of anxiety it's classified as a disorder. Periods of transition, stress, and upheaval of routine can negatively influence a child's wellbeing if he or she is unable to effectively cope.

The COVID-19 pandemic is a bundle of transition, stress, and routine disruption, and everyone is feeling the effects in different ways. Children are isolated from their friends and from the routine school and extracurriculars, and some fear for the health and safety of themselves or their loved ones. Here are some things to watch for and ways to help your child through big feelings.

Recognizing Signs of Anxiety

Not all brains are created the same, and neither are the worries inside them Different children have different anxiety triggers and there are countless ways children display panic.

Because there are so many ways to respond to feelings of anxiety, warnings often slip by under the mask of "bad" behavior. Common responses such as trouble sleeping or eating, or general opposition can appear as willful defiance. However, major changes in behavioral patterns usually indicate

These changes often result when children don't realize that what they're feeling is anxiety. Many may not have the language skills or ability to express what's going on inside of them, or they may not be able to tell the difference between anxiety and other feelings. Behaviors can result as a way

PARENTS LEAD.

Talking to Your Child about COVID-19

Elementary School

The World Health Organization officially declared coronavirus a pandemic. Health experts predict that the virus and its impact on our communities are just beginning.

You play an important role in helping children and teens better understand what's happening and help them manage their own related worries or anxiety.

Here are some tips that can help:

School-age children will be more aware of what is going on. They have probably had discussions at school and with friends.

- Talk to your elementary age children. Explain what happened while reassuring them that you and your child's teachers will do everything to keep them healthy and safe.
- Children this age are also concerned about their own health, as well as that of family and friends. For example, they may have heard that kids aren't impacted by coronavirus but that older people are, triggering fears about grandparents. They may be worried about money if they know adults are off of work. Try to spend extra time together. This will provide extra reassurance
- On't be surprised if they are more irritable and touchy. Be extra patient.
- Limit media coverage.
- Try to continue normal home routines, especially at bedtime. If routines are disrupted due to school or after school activity closures, explain that this is part of the precautions grown-ups are taking to prevent people from getting sick. It doesn't mean that all of their teachers and friends are sick.

- If fear persists, point out all the things adults are doi to help and to prevent the virus from spreading. Children like to be helpful and feel like they can do something from hand washing to writing letters to
- Ask them if they have any questions. If they do, stick the facts and tell them what you know without exaggerating or overreacting. Use these resources help them learn more about the virus:
 - · "Understanding Corona Virus and How Germs Spread' - Brains On Podcast (plus a kid-centered series on news literacy called "Prove It.")
 - . 'Just for kids: A comic exploring the new coronavirus" - Minnesota Public Radio

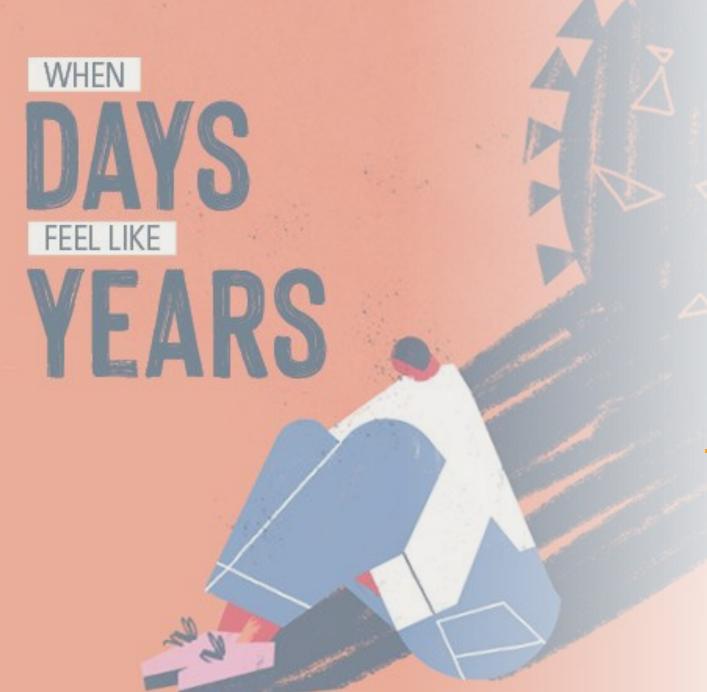

With media coverage and obvious changes to our daily routines, even the youngest children are aware that something big is happening. Your child may express anxiety over the unknown, or more specifically, fear of a loved one getting sick. If a loved one does get sick. acknowledge your child's feelings, whatever they are. Your child may want to help their family member while they are sick, but with strict contact guidelines they won't be able to physically be around them. Let them send letters, cards, art projects, and if your loved one is well enough- try out a video chat. If you need to seek out professional help, many facilities are offering telehealth services and can aid in dealing with heavy topics.

Remember that you are your child's number one source of strength and comfort. Taking care of yourself will better allow you to take care of your children, so make sure you have healthy outlets for all the different emotions you're feeling as well.

When Speaking About Your Loved One's Illness

Before starting the conversation, prepare yourself for success by maintaining awareness of your child's verbal abilities and previous experiences with illness and death. Keep in mind your child's attention span and find a time where you can tune out distractions. Be clear that the conversation is important, and keep it as focused on positivity as possible.

Explain in a factual manner what COVID-19 is, using reputable sources like the Center for Disease Control (CDC) and the World Health Organization (WHO). If your child voices concerns, respond honestly, trying to spare them from pain may only leave them more confused. Most importantly, be adamant they will always be taken care of.

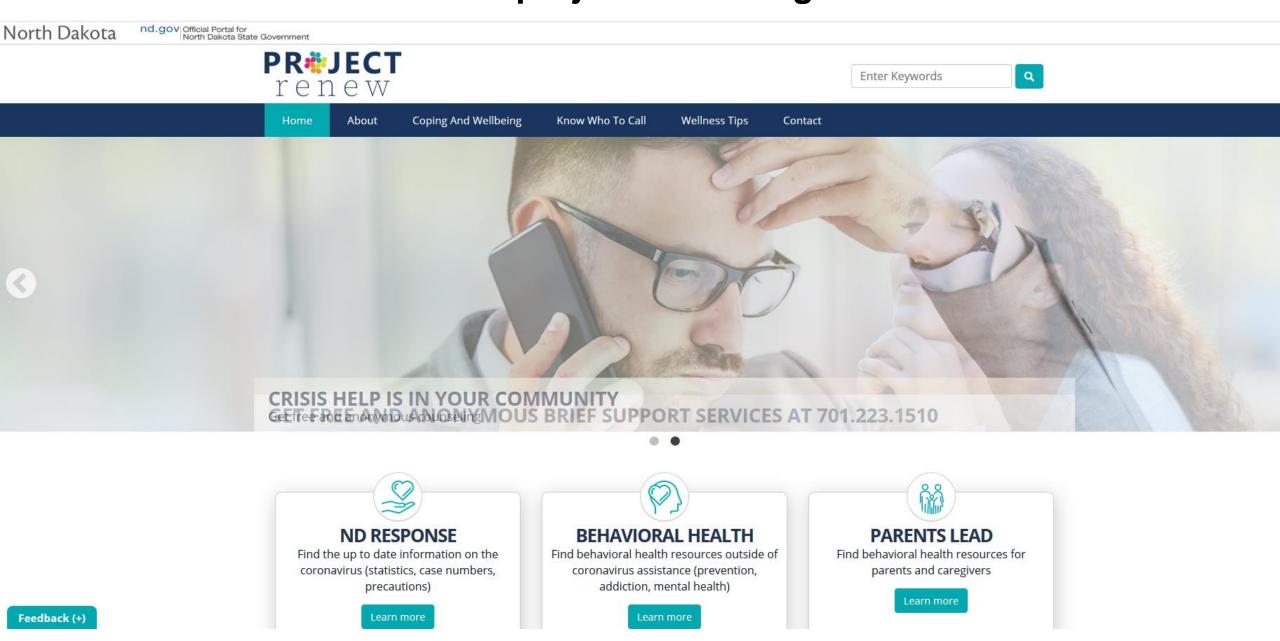

Project Renew services, provided in partnership with Lutheran Social Services of ND, include:

- supporting community members in understanding physical and emotional reactions to COVID-19
- developing and improving coping strategies
- reviewing options, and connecting with other individuals and agencies that may be of assistance.
