# Combined Behavioral Health Assessment and Plan **TIMELINE**

---

# Combined Behavioral Health Assessment and Plan **OVERVIEW**

---

SAMHSA's MHBG and SUPTRS BG **provide states with the flexibility to design and implement activities and services** to address the complex needs of individuals, families, and communities affected by substance use disorders and for adults with SMI and children with SED. The purpose of the block grant programs is to support services addressing these needs.

For the Secretary of HHS, acting through the Assistant Secretary for Mental Health and Substance Use, to make an award under the programs involved, **states must submit an application(s) sufficient to meet the requirements described in SAMHSA's block grant authorizing legislation** and implementing regulations sufficient for SAMHSA to monitor the states' compliance efforts regarding the obligation and expenditure of MHBG and SUPTRS BG funds.

# Role of the Behavioral Health Planning Council

As identified in the By-Laws, one of the duties of the council is to:

- review and provide feedback on applications for the Mental Health/Behavioral Health Block Grants and any related stakeholder input into such applications, at least semi-annually.
